RESEARCH INTEREST

His research interests include blockchain, crowdsensing, Internet of things, security, privacy, etc.

EDUCATION

Shanghai Jiao Tong University (SJTU)   **Shanghai, China**
Ph.D. Candidate in Computer Science and Engineering   *April 2020 - present*

Shanghai Jiao Tong University (SJTU)   **Shanghai, China**
Master Candidate in Computer Science and Engineering   *September 2018 - April 2020*

University of Electronic Science and Technology of China (UESTC)   **Chengdu, China**
Bachelor of Computer Science and Technology   *September 2014 - June 2018*

ACADEMIC PROJECTS

Map Attacker *May 2018 – June 2020*
- We observe the fact that navigation apps will collect users' GPS data to calculate the real time traffic status.
- The main idea of this project is to utilize this fact to defraud navigation apps by uploading fake GPS data.

BlockSense: Blockchain + Crowdsensing *July 2018 - present*
- We combine blockchain and crowdsensing to build a trustworthy decentralized crowdsensing platform, which breaks the traditional centralized triangular architecture.
- We also propose the Proof-of-Data (POD) consensus mechanism, to leverage miners to verifying data quality while without knowing the content of data.

Hidden Camera Detection *September 2019 - January 2020*
- Motivated by more and more hotel candid shots events, we try to detect if there exists any hidden camera through reading EMI signals from the power line, which is inspired by ElectriSense (Ubicomp'10).
- We built a PLI module and used USRP N210 to construct the experiment platform.

AWARDS AND ACHIEVEMENTS

- Second prize of "Huawei Cup" 17th China Post-Graduate Mathematical Contest in Modeling (Problem A) in 2020.
- Excellent Scholarship for Doctoral Students in 2020.
- National Graduate Scholarship in 2019.
- First prize of National Universities and Colleges Blockchain Contest in 2018.
- First prize of National College Student Information Security Contest in 2017.
- Outstanding Undergraduate of UESTC in 2017.
